- Purpose
- The Role of PHIN
- Today's Approach
- Logistics
- Scenario Walkthrough
- Breakouts
- Present Breakout Results
- Wrap-up

Introductions

SAFER • HEALTHIER • PEOPLE

Purpose

- To better understand your emergency response processes
 - Identify the people involved in dealing with an event
 - Find out what information and data they need
 - Determine when they need it
 - Identify how they get it
- Develop IT Systems to support these processes

The Role of PHIN

- Information facilitates better decisions
- PHIN provides critical data and information
 - Based on industry standards
 - Common data formats
 - Standardized vocabulary
 - Secure
 - Highly available

Today's Approach

- Validate existing draft requirements
- Add to the requirements
- List any issues with them

Logistics

- Scenario walkthrough
- Break into small groups
 - Identify a representative to present when we regroup
 - Choose someone to record the items identified
 - Make sure you record all items
 - Prioritize your Top 5 items to present back to the group
- Present small group results

Scenario Walkthrough

SAFER • HEALTHIER • PEOPLE

Anthrax Release

- Local Law enforcement receives a tip about missing anthrax
- Building maintenance worker releases aerosolized anthrax spores

Eagle Plaza

Cases Emerge

- Two days later, people start arriving at various clinical sites complaining of flu-like symptoms.

Seeking an Explanation

- Patients are experiencing chest pain and respiratory distress
- Talk of “spring flu” occurs among the healthcare community
- Five days after the release, a person shows the symptoms of anthrax
 - growth of gram-positive rods
 - widened mediastinum
- Tests confirm the suspicion

Confirmation Testing

- Samples are sent to CDC and elsewhere to confirm *Bacillus anthracis*

CDC

Treatment and Prophylaxis

- Emergency supplies are ordered from the Strategic National Stockpile (SNS)
- Patients are treated
- Candidates for prophylaxis are identified
- Distribution sites are established

Cleanup

- Eight days later, a pattern is finally found
- Eagle Plaza is closed
- Hundreds of other samples are taken from around the city

Eagle Plaza

Breakouts

- Use requirement IDs from your printed materials (e.g., PR32) when commenting about existing requirements
- Points to ponder
 - How were samples transmitted and managed?
 - How did the processing of these samples impact the LRN?
 - How was IT used by the LRN?
 - How can IT facilitate a more efficient process in the future?

Break out!

SAFER • HEALTHIER • PEOPLE

Requirements

- PR: 9, 10, (13-18), 19, 20, (24-30), 32, 54, 55, 58, 61

Regroup and Present

SAFER • HEALTHIER • PEOPLE

Acknowledgements

- Subject Matter Experts for helping with the sessions
- Dr. Seth Foldy for contributing the scenario

Wrap-up

- Q & A
- Feedback forms
 - Back of the room
 - Information desk
- Session evaluation forms
 - Back of the room
